

## **Valley Denture Clinic**

### **Procedure for Patients entering the Clinic**

1. The front door will be locked. Please press the bell or ring the contact number on the door.
2. Your temperature will be checked using a non-contact forehead thermometer and a check list of questions will be asked.
3. You will be directed to our clean room to wash your hands.
4. You will be directed straight in to the surgery where the clinician and assistant will be wearing more PPE than normally seen. This is something we have to wear for your safety.
5. You will be provided with a mouthwash to rinse your mouth.
6. We will have to adhere to strict appointment times as we will require extra time between patients for decontamination procedures.
7. Unfortunately at this time we are unable to offer you a hot drink but we can offer you a new unopened bottle of water for refreshment.
8. Unfortunately we can not offer toilet facilities at this time.

**Thank you for your patience and understanding.**
